Let's start Zikitec ®

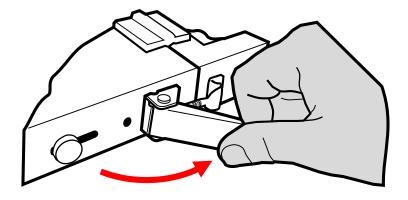

1. Move the rubber, and open the table.

2. Note that the table fully opened, and no objects that kept him from fully opening.

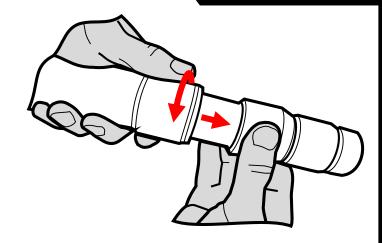

3. Lock the side lock until you hear a "click"

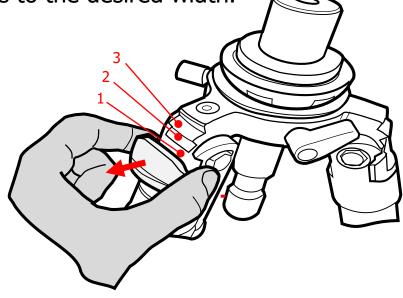

4. Adjust the tripod legs to the desired

Zikitec ®

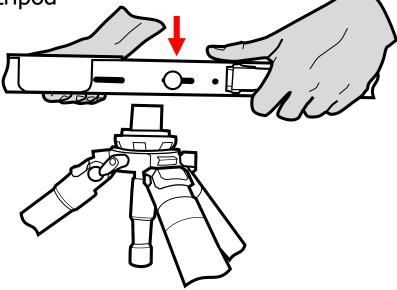

length.

5. Spread the tripod legs to the desired width.

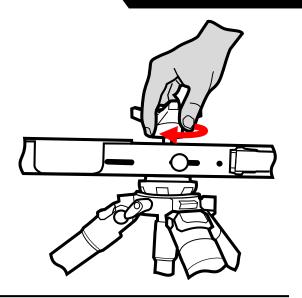

6. Place the bench on a tripod

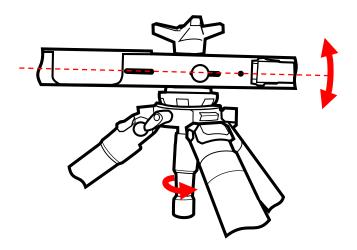

Zikitec ®

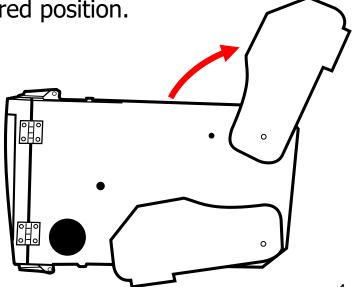

7. Screw the bench to the tripod.

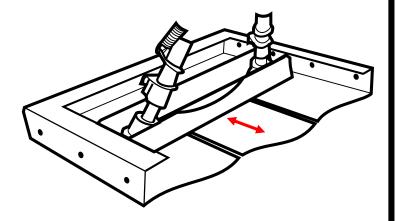

8. Turn the handle to control ball-joint of the bench.

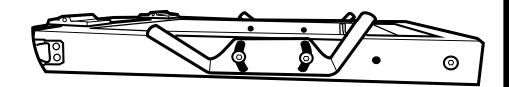

9. Open the wings to the desired position.

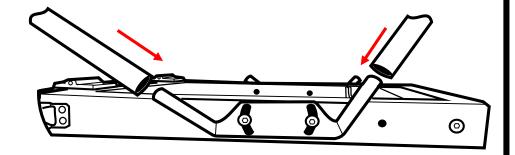

10. Use the bipod tunnel to adjust the Location of the weapon on the bench.

11. For connecting camouflage to the TSB connect the UCA (urban camo adaptor) to the front plate.

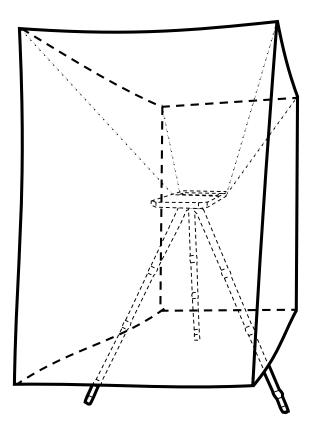

12. Connect the camouflage poles to the UCA

Zikitec ®

13. Put the camouflage on the camouflage Poles when net upfront.

Possible malfunctions and solutions

Zikitec[®]

- The bench is shaky after the connection to tripod check if the connector attached well to the tripod, if not rotate him on the screw.
- 2. The connection between the middle and front plate is not good adjust the side lock tighter.
- 3. The tripod leg is slipping close stronger the Led length adjustment screw.
